[Ammo CoP]

NEWSLETTER

From the Desk of:

Our weekly update focuses on new discussions, content and members. The Ammo CoP offers members a chance to connect and collaborate with, quality content and discussions available, all specifically for all professionals who work with and/or around ammunition (Military, Civilians and Contractors alike)! Pass this newsletter on to your friends and peers that may not have heard about the Ammo CoP and invite them to join us at: <https://acc.dau.mil/ammo>

Feature Requests...

In a continued effort to improve on this Newsletter and make it serve the purpose of the CoP, if you have something you would like to see highlighted in this newsletter (people, activities, ammo items, etc...), or if you have any pictures and/or bits of information you would like to include in future newsletters, please send them to me.

Department of Defense Lock Program

The mission of the Department of Defense (DoD) Locks, Safes, Vaults, Seals, and Containers Program ([DoD Lock Program](#)) is providing management, operation, and logistics support functions for physical security equipment. This development, procurement, and integration support assures that Arms, Ammunition, & Explosives (AA&E) and National Security Information (NSI) are protected in accordance with DoD and component agency physical security storage requirements.

Subscribe to SECURITY FACTS newsletters: *If you would like to subscribe to the Security Facts newsletter, send an email to:*

Remember this forum is for collaboration and knowledge sharing among all of us within the ammunition community. If you have a question that we may be able to help you answer, or if you have developed an SOP, best practice, or TTP that helps you do your job, post it to Ammo CoP. The few minutes you take to upload something could save someone else hours of work. If you're not sure how or need assistance just send me a note or visit the user training site available at: <https://acc.dau.mil/usertraining>

[Ammo CoP] NEWSLETTER

AIN 025-16

GRENAD, OFFENSIVE, MK3 SERIES (DODACS 1330-G910 AND 1330-G911) RESTRICTED TO USE IN ORS/OCO ONLY - ASBESTOS HAZARD

Request this [AIN](#) be disseminated to all personnel involved in inspecting, storing, handling, issuing, or using subject ammunition.

The MK3 series grenade inventory has been determined to contain asbestos. The exterior coating and residue of the grenade contains between 17-50% chrysotile asbestos. Exposure must be limited to reduce health risk.

There is no direct ammunition substitute for the MK3 series grenade. The M84 Stun Grenade can be used as alternate ammunition to support limited concussion operations; however the M84 lacks the lethal overpressure capabilities of the MK3. Commanders should modify tactics to use the M84 Stun Grenade in confined spaces. See [TC 3-23.30, Grenades and Pyrotechnic Signals](#) for safety procedures and precautions for use of the M84 Stun Grenade.

Ammunition Item of the Week

**DODIC – G911 Grenade, Hand: Offensive,
MK32**

The [MHP Inspection Criteria Module](#) has inspection criteria for the G911.

[Ammunition Multimedia Encyclopedia \(AME\)](#) has a step-by-step inspection video showing defects for the G911.

TM 9-1330-200-34,

Marine Corps TM 1330-34/1A

Direct and General Support for Grenades
With change 9, 29 October 2015

[This manual](#) is one of a series of technical manuals (TM's) covering general and technical information, servicing, operation, and maintenance of subject materiel. Information in this manual is limited to responsibilities of direct and general support maintenance personnel (i.e., maintenance which is beyond the scope of the tools, equipment or supplies normally available to operator and organizational personnel).
